CHAPTER 7
TREES

URBAN FOREST

Sec. 7-100 Findings and purpose.

The Village Council finds that it is in the interest of the village and its residents to protect, preserve and promote the village tree canopy. This tree canopy is part of a larger ecosystem and contributes significantly to air, noise and visual pollution control. The existence of shade-providing trees moderates climatic extremes and promotes sound energy conservation. The Village urban forest is part of a watershed and therefore, plays an important role in controlling water run-off and supporting the biologic and hydrologic integrity of the area. The tree canopy also has significant aesthetic value, which affects property values and the quality of life of our community. Regulation of actions affecting the tree canopy provides mutual benefits to village residents and property owners.
